

MASTER OF SCIENCE

Finance

Effective leaders are needed to answer the new challenges facing finance professionals with today's changing markets and increased regulatory environment. According to the NACE (National Association of Colleges and Employers) 2018 Job Outlook Report, a graduate degree in Finance is one of the most desirable credentials for employment. The MS in Finance teaches the core competencies and skill sets needed to succeed in business and enables a student to focus on their desired career path.

SELECT ONE OF THREE CONCENTRATIONS

Corporate Finance — Finance professionals work to ensure effective use of capital, advise their business about project costs, make capital investments, and structure deals to help their companies grow.

Investment Management — Investment professionals analyze markets and economic conditions, understand different securities and learn how to value them. They construct optimal portfolios that meet individual and institutional goals in the global competitive marketplace.

Accounting — Accounting professionals are a valued member of the CFO's financial team by integrating the core financial and accounting competencies expected of financial managers. The accounting track provides undergraduate accounting majors with the credits and required courses for CPA licensure as well as important accounting skills for those pursuing financial management careers.
