

To All Members of the Manhattanville Community:

I would like to take a moment to advise you that Manhattanville College has been and continues to closely monitor the Health Advisories related to the H1N1 virus (Swine Influenza). Our Health Center continues to be in contact with the Westchester Department of Health for the latest updates and recommendations, and a team of Manhattanville staff and administrators is meeting regularly to ensure all preventive measures and appropriate responses are in place. In addition, all members of the Manhattanville Community who live and work here receive regular information and updates from the Health Center.

We have had **no cases** at Manhattanville College. As with all strains of flu it is advisable to wash hands regularly with soap and warm water, use hand sanitizers, eat properly, rest well, and avoid close contact with people who are sick. For more information about the H1N1 virus please visit our website at:

<http://www.mville.edu/OfficesandServices/EmergencyPreparedness/ConcernsAboutFlu.aspx>

Wishing you well.

Sincerely,

J. Gregory Palmer  
VP Operations
