

The recent shootings in Kenosha, Wisconsin have shocked and horrified us. While the details are still unfolding, the shooting of Jacob Blake and the murders of two people by an alleged militia member or counter-protester indicates that more work needs to be done to undo racial injustice. We recognize that profound racial inequities in our country have caused and continue to cause great pain and anger to many, particularly Black and African-Americans. We at Manhattanville College support everyone's right to free speech and peaceful protest or counter-protest and reaffirm our responsibility at Manhattanville to create positive change on our campus that affects the experience of all of our students.

Michael E. Geisler, Ph.D.
