Students with COVID-19 Vaccine Exemptions - Weekly Surveillance

- If you are a student with a medical/religious exemption from the COVID-19 vaccine, you must participate in weekly surveillance testing.
- **Full-time, undergraduate students, and residential, graduate students** are eligible to receive their required weekly test at SHAC.
- Walk-in testing will be held (no appointment necessary) on **Mondays from 10a-11:30a and Wednesdays 1p-2:30p** in SHAC Health Services - Spellman G-17.
- Full-time Undergrads, or Residential Grads who are unable to make it at either of the walk-in times, and would prefer to make a weekly standing appointment at an alternate time are encouraged to call or email SHAC to inquire about this possibility.
- Students who obtain their required weekly tests at an off-site location must upload their test result to the **student health portal (mville.studenthealthportal.com)** every week.
- The testing week is considered to be Sunday through Friday.
- Failure to comply with weekly testing will result in restriction from campus.
- Continued non-compliance is a violation of the student code of conduct and will result in a referral to the conduct process.

- **Part-time Undergrads, or Commuter Grads** are responsible for obtaining a weekly COVID-19 test at an off-site location and must upload their result to the **student health portal (mville.studenthealthportal.com)**.
- The testing week is considered to be Sunday through Friday.
- There must be 4 days between COVID tests.
- Failure to comply with weekly testing will result in restriction from campus.
- Continued non-compliance is a violation of the student code of conduct and will result in a referral to the conduct process.

Exempt students are required to submit a weekly negative COVID-19 diagnostic test for the duration of time they are not fully vaccinated and boosted (if booster eligible).
SHAC is now accepting at-home tests for weekly testing, if used and submitted appropriately.

**Instructions for submitting an at-home test:**

Most at-home COVID-19 Diagnostic tests are acceptable; however, because the FDA has issued a warning against the **Empowered Diagnostics CovClear COVID-19 Rapid Antigen Test** and the **ImmunoPass COVID-19 Neutralizing Antibody Rapid Test**, we are not accepting these for the purposes of the required weekly tests.

Students taking an at-home test must take a photo with all of the following information in the same frame:
- A clear picture of the result of the test
- On the test, the “shape of the week” to identify it was taken in the correct time frame (contact **shac@mville.edu** for more info)
• a government-issued photo ID or Manhattanville ID in the picture next to the test
• an indicator of the date test was administered

The date the test was administered can be indicated by using a digital timestamp on the photo and by writing your name and the date and time the test was administered on the test kit or a piece of paper and including it in the photo.

If you submit an at-home test you are certifying that you took the test yourself, and that the result you provide to SHAC is the result obtained from taking the test as directed.
